1. Field of the Invention The present invention relates to a combustion method for a high-pressure combustion heater and a compressor, a jet engine, and an exhaust gas purifying device. 2. Description of the Related Art A conventional compressor for a gas turbine and a jet engine has been operated in a large range of temperature, in a range of 100 to 400° C., a range of atmospheric pressure, and a range of jet temperature, but it has been difficult to stably operate the compressor in a temperature range between approximately 700° C. and 900° C. because the temperature is close to a burning temperature. Furthermore, in a compressor, an expansion f678ea9f9e
